

Subjects

Subjects are kept so that minds of pupil can be enlightened,
But my experience says that of studies they are frightened.

In the company of books children hardly feel nice.

In this matter they don't want to take anybody's advice.

English is the most difficult Subject,
In there would be option pupil would like it to reject.

Hindi is all about poem and tales,
To understand it, each & every student fails.

Algebra is full of calculations,
children feel difficult to carry out algebraic operations.

There is another difficulty is that only proof to be written in Geometry,
It is not easy to understand Symmetry.

The most challenging Subject is history.
It's not as easy as chemistry.
History involves dates and incidents,
It gives information about past accidents.

Only drawing is the Subject liked by all,
In this each and every student like to involve
And so we all say that east or west
Drawing is the Best.

* THE END *

INDIAN CRICKET

In ODI and Test, Indian team is best in all, Rest of the teams in front of India are too small.

Cricket is eleven players game, This gains them fame.

Batting and bowling are cricket's two phases, where batsman and bowler's performance have to be mixed.

Tendulkar is considered as cricket's God, He has got the place besides Lord.

By Sachin, Sehwag and Yuvraj the way for win paved. Even the difficult matches by them are saved. Indian team has a powerful batting line-up. Fielders are always ready for back-up.

Bowlers are the strength of Indian team, Adversary are challenged by their spin. India ranks top in test matches, This is because of their fabulous catches.

The team spirit among players is great, They are also favoured by their fate. My wish is that they may attain great height, And they may win each and every fight.
